To calculate the estimated cost of employee or spouse supplemental life insurance, first find you or your spouse's age in the table, then find the cost per coverage amount. For example, a 32-year old employee would spend \$0.25 per pay period for \$10,000 of life insurance coverage. Multiply the cost per coverage by the amount of coverage you want. For example, the 32-year old who wanted \$20,000 or employee supplemental coverage would pay \$0.50 per pay period.
