Supplemental Life Insurance

To calculate the estimated cost of employee or spouse supplemental life insurance, first find you or your spouse's age in the table, then find the cost per coverage amount. For example, a 32-year old employee would spend \$0.25 per pay period for \$10,000 of life insurance coverage. Multiply the cost per coverage by the amount of coverage you want. For example, the 32-year old who wanted \$20,000 or employee supplemental coverage would pay \$0.50 per pay period.

| wanted \$20,000 or employee supplemental coverage would pay \$0.50 per pay period. | | | | | | |
