Supplemental Life Insurance	
-----------------------------	--

To calculate the estimated cost of employee or spouse supplemental life insurance, first find you or your spouse's age in the table, then find the cost per coverage amount. For example, a 32-year old employee would spend \$0.25 per pay period for \$10,000 of life insurance coverage. Multiply the cost per coverage by the amount of coverage you want. For example, the 32-year old who wanted \$20,000 or employee supplemental coverage would pay \$0.50 per pay period.

Disability Insurance

To estimate your Short-term Disability or your Long-term Disability payroll deduction per pay period:

1. In the appropriate table, find the salary closest to yours. You may need to round your salary up or down to find the amount closest to yours. The maximum annual salary is \$300,000.
2. Find the deduction for the salary that matches your employment status. This is your estimated deduction per pay period.

Short-Term Disability Replaces 60 percent of your base weekly salary after 7 days of disability, up to 5 months.	Long-Term Disability Replaces 60 percent of your base monthly salary after 5 months of disability, possibly to normal retirement age.
